SUMMARY

Recent CS graduate with hands-on experience building RESTful APIs, full-stack web apps, and automated workflows across manufacturing and banking domains. Proficient in Java, Python, React, Spring Boot, and Microsoft Azure/Power Platform. Delivered a Power Apps solution that reduced process execution time by 20% and scrap rates by 6%. Certified in Azure AI and Power Platform.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, PHP, SQL

Frontend: React, Bootstrap, HTML, CSS

Backend & Cloud: Spring Boot, RESTful APIs, JWT, Swagger/OpenAPI, Azure, AWS EC2, Power Apps, Azure OpenAI

Databases: SQL Server, MySQL, MongoDB

EXPERIENCE

Quality Systems Analyst · Martinrea International

Aug 2025 – Present

- Built and expanded Power Apps digital workflows automating inspections, audits, and work instructions, improving real-time data accessibility across production teams.
- Applied GR&R statistical analysis to evaluate measurement system capability, producing data-driven insights that improved gage reliability and engineering decisions.
- Managed GageTrak calibration database and performed root cause analysis (3x5 Why) to identify failure patterns and drive corrective actions reducing quality escapes.

Full-Stack Developer · Commerce Bank BankEase Budgeting App (Apprenticeship)

Jan 2025 – May 2025

- Built a full-stack budgeting platform with expense tracking, subscription management, and role-based dashboards using Java, Spring Boot, React, and SQL Server.
- Engineered secure RESTful backend with JWT authentication and RBAC; designed responsive React + Bootstrap UIs optimized for desktop and mobile.

Quality Systems Intern · Martinrea International

May 2024 – Dec 2024

- Designed Power Apps-based workflows reducing manual data entry, standardized checksheets and data templates reducing scrap rates by 6%.
- Executed 2,000+ weld inspections and engineered Layered Process Audit templates with automated scheduling for systematic deviation tracking.

PROJECTS

Manufacturing Website ([ArcForce1](#)) · HTML · CSS · JS · PHP

Jan – May 2023

- Designed and developed a fully responsive manufacturing website with secure PHP-handled contact form submission.

Find a Friend – Social Web App · PHP · MySQL · AWS EC2

Jan – May 2024

- Full-stack social platform with authentication and profile management; deployed on AWS EC2 with 99.8% uptime.

Auto Scaling Staff App · Spring Boot · MongoDB · Swagger

Jan – May 2023

- Scalable RESTful backend with dynamic job listings; integrated Swagger/OpenAPI for automated API documentation.

EDUCATION

B.S. in Computer Science · University of Missouri – Kansas City

Dec 2025

Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Software Engineering, Cloud Computing, Machine Learning

CERTIFICATIONS

Microsoft Certified: [Azure Fundamentals](#) · [Azure AI Fundamentals](#) · [Power Platform Fundamentals](#) · Prompt Engineering with OpenAI (DataCamp)
